Message from Our CEO

John Gross

CHIEF EXECUTIVE OFFICER / FOUNDER

In 2018, NDH technologies was founded under the umbrella of NDH Trading. Since then, with customers. We have grown together, but in 2020 the COVID-19 pandemic will take control of us humanity and we will be global.

It's been a year of big themes of community and economic restructuring. What has been taken as "natural" is no longer natural, and the way of working, the way of doing business, and the way of engaging with the community. We human beings were required to reconsider such things.

NDH technologies' mission was to face such a crisis of humankind. "A safe future for people around the world."

Now that social and economic conditions have changed drastically, many people are stuck only in the "now" and it is difficult to see the "future". it might be. Comprehensive financial technology that allows as many people as possible to look to a solid future and move forward. As a service, we have decided to expand NDH algo to the Asian market.

We will not stop growing. We know that it will lead to a safe future for our customers.

John Gross

a safe future for people around the world.

NDH algo

〔About NDH algo〕

NDH algo is a financial technology service provided by NDH technologies, a subsidiary of NDH Trading, based in New York City, USA. In the midst of rapid growth, we will release it to Asia in 2021.

High Frequency Trading

Crypto Mining

High Frequency Trading (HFT) :

Refers to high-frequency, high-speed financial transactions that are carried out in milliseconds by a computer program system. While capturing the momentary movement, we will accumulate profits by repeating transactions of thousands to 10,000 units per second with a small price range.

Crypto Mining (Mining) :

Generally, it refers to performing a huge amount of arithmetic processing such as transaction data analysis for the purpose of obtaining the right to newly grant cryptocurrency and verification fee. We will secure profits by various means such as linking mining pools and opening mining farms.

Revenue Axis

「About Profit」

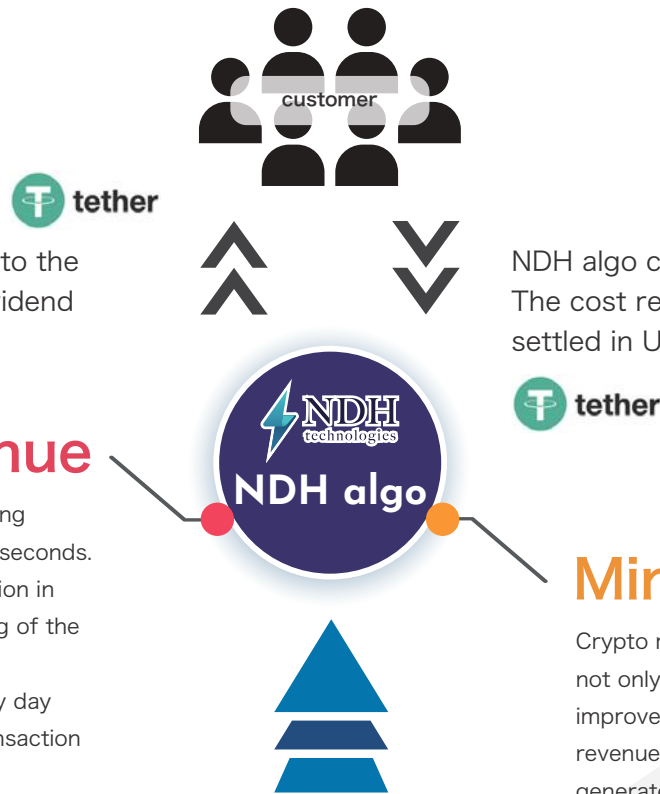

NDH algo, which is a package of HFT and Mining provided by NDH technologies, is a service that combines HFT with established positive profits and Mining with stable profits. Then, NDH technologies pays the customer twice a month (1st and 15th) a dividend reward including the profit added to the activity result of the customer called "Reward bonus".

Revenue scheme

「About Revenue scheme」

NDH algo's revenue scheme is simple. It consists of HFT trading revenue and Mining revenue, and this revenue is paid to the customer as a source of dividends.

With the registered USDT wallet according to the quantity of tech owned You can receive dividend compensation at USDT.

NDH algo customer registration. The cost required for the application tech quantity is settled in USDT.

HFT trading revenue

NDH technologies operates with an in-house developed trading system optimized for cryptocurrency trading in tens of nanoseconds. The world of HFT trading consists of a very simple composition in which the winner is the one who shows a good understanding of the speed and market structure of the trading system built. Among them, NDH technologies continues to challenge every day based on the technology that boasts the highest level of transaction speed and its unique knowledge of financial markets.

Mining revenue

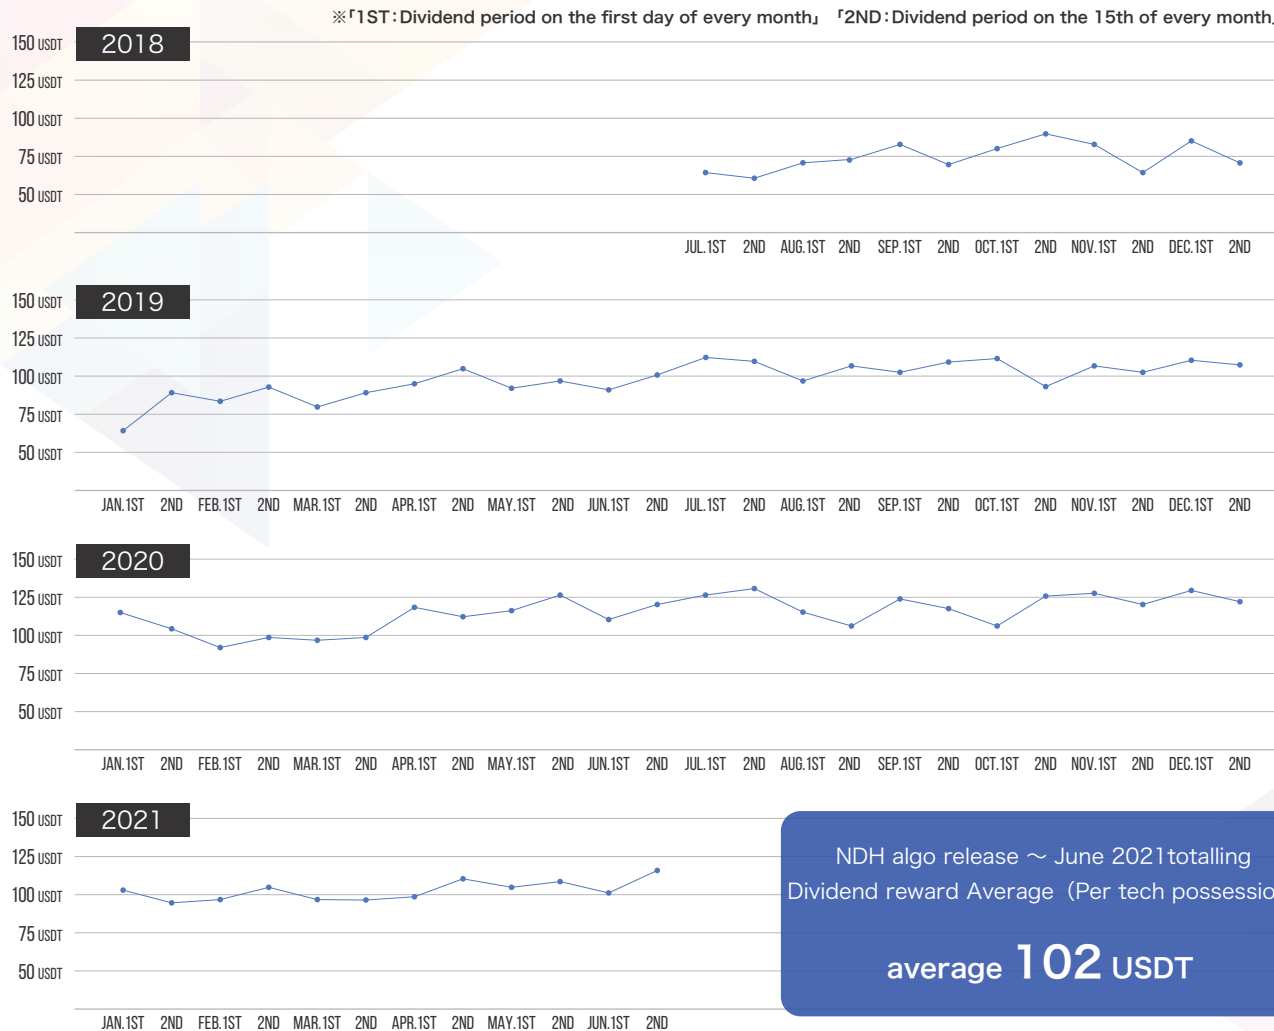

Crypto mining, which is intensifying competition around the world, not only requires better technology, but also the financial power to improve the environment. And in order to always obtain stable mining revenue, it is also necessary to partner with mining pools that generate high quality and high performance revenue from all over the world, and NDH technologies is building that network.

CRYPTOCURRENCY MARKET

Dividend Reward (DR)

「About Dividend reward」

NDH algo uses "tech" as the unit, and receives dividend compensation twice a month (1st and 15th) according to the amount of tech held by the customer from the profits obtained by HFT and Mining. receive.

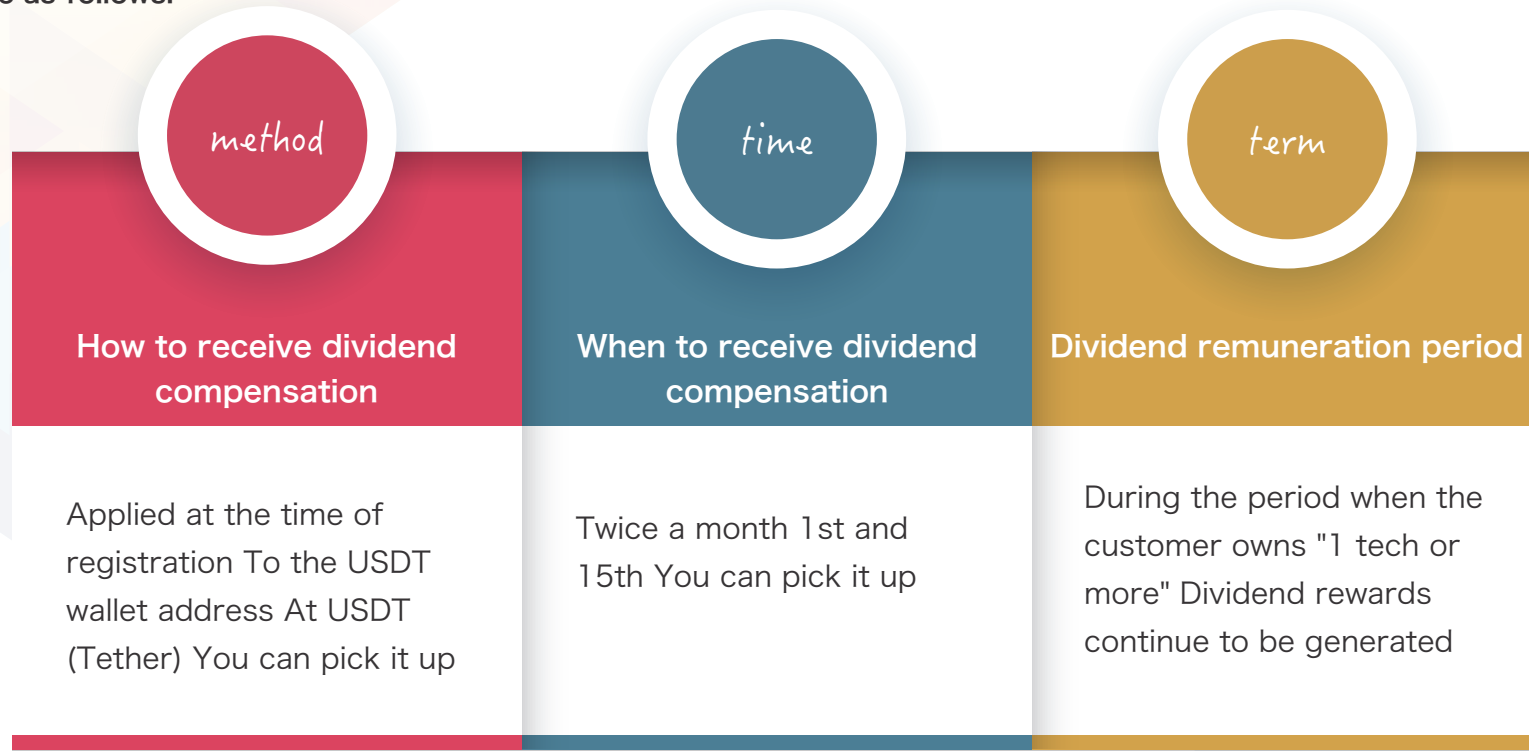

The cryptocurrency market is generally a market with volatile rates, but there is no impact on NDH algo's HFT and Mining, and the amount of dividend compensation per dividend has been steadily increasing even compared to the beginning of the release. The graph below shows the ratio of dividend compensation to 1 tech held.

Payment details

「Dividend compensation details」

The "receipt method," "receipt time," and "reward generation period" of dividend compensation paid by NDH technologies to customers are as follows.

Dividend compensation paid from HFT and Mining revenues may increase or decrease depending on the situation, but the NDH algo agreement stipulates that customers will not be disadvantaged.

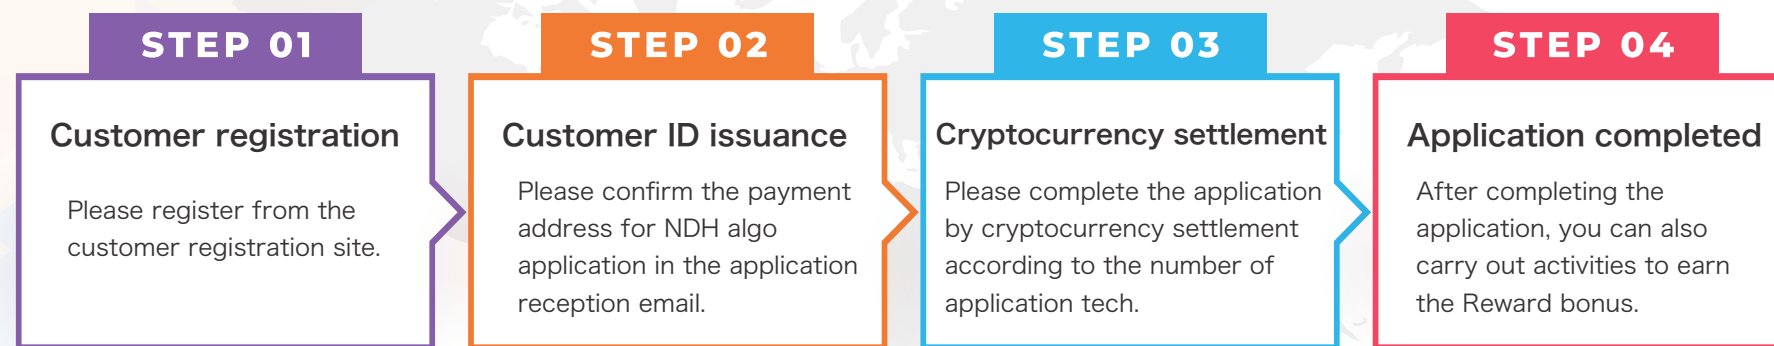

NDH algoRegulations regarding dividend compensation

NDH technologies stipulates that the minimum guaranteed amount of dividend compensation for 1 tech is 75 USDT. In the event that the dividend compensation amount per tech falls below the regulation, the difference from the actual dividend compensation amount will be filled and the prescribed 75 USDT will be paid.

Flow of start of use

[Flow until application is completed]

It takes 4 steps from customer registration to application completion. All payments and rewards at the time of application are USDT (Tether).

Reward Bonus

summary

Reward Bonus (RB)

「About Reward Bonus」

The Reward bonus (RB reward) generated by NDH algo's referral activities is eligible for RB rewards up to the 5th stage, not only for the 1st stage Directory, but also for the 2nd and subsequent stages of Indirect. And it is not a one-time occurrence, but will be paid permanently as long as the referred customer continues to own more than 1 tech as an NDH algo customer.

※See page 15 for how to calculate the RB reward amount.

1

POINT PICKUP
Reward Bonus

RB rate of return
2% ~ 20%

2

POINT PICKUP
Reward Bonus

RB reward
Occurs permanently

3

POINT PICKUP
Reward Bonus

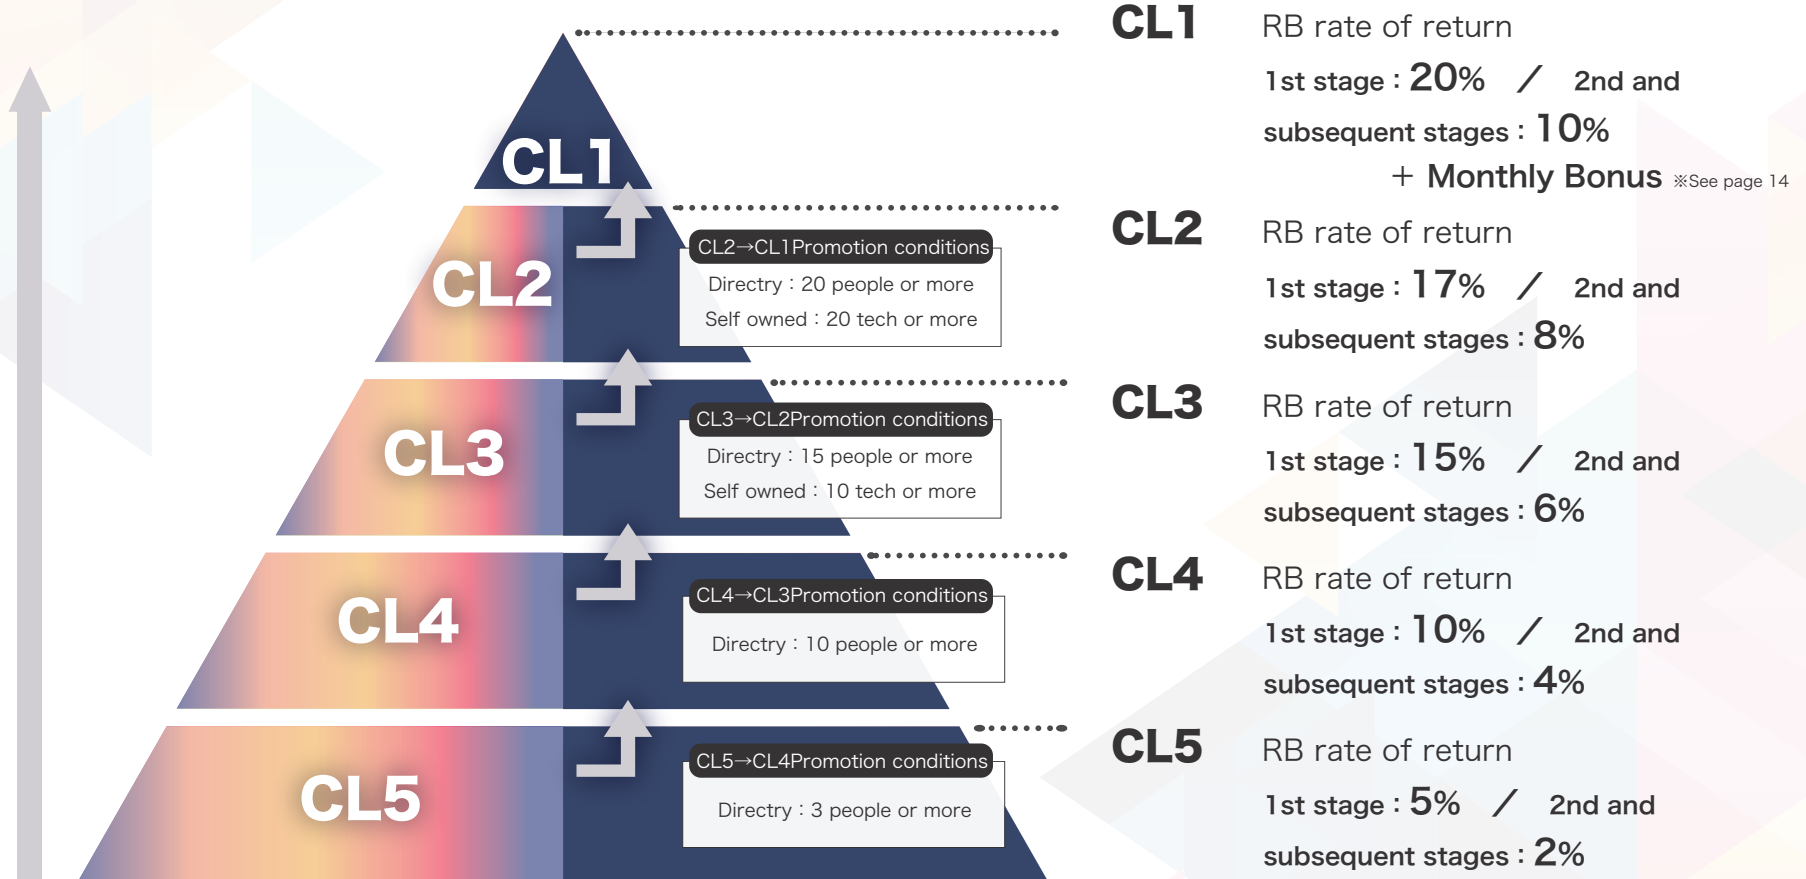

When to receive the RB reward
1st and 15th of
every month

Customer Level (CL)

「About customer level (CL)」

When registering as an NDH algo customer, there are 5 steps from "CL5" to "CL1". If you meet the following promotion conditions stipulated in the CL regulations, you will be automatically promoted.

The RB rate of return will be applied immediately after promotion, but will be demoted to CL if the CL conditions are no longer met.

CL1 RB rate of return
1st stage : **20%** / 2nd and subsequent stages : **10%**
+ **Monthly Bonus** ※See page 14

CL2 RB rate of return
1st stage : **17%** / 2nd and subsequent stages : **8%**

CL3 RB rate of return
1st stage : **15%** / 2nd and subsequent stages : **6%**

CL4 RB rate of return
1st stage : **10%** / 2nd and subsequent stages : **4%**

CL5 RB rate of return
1st stage : **5%** / 2nd and subsequent stages : **2%**

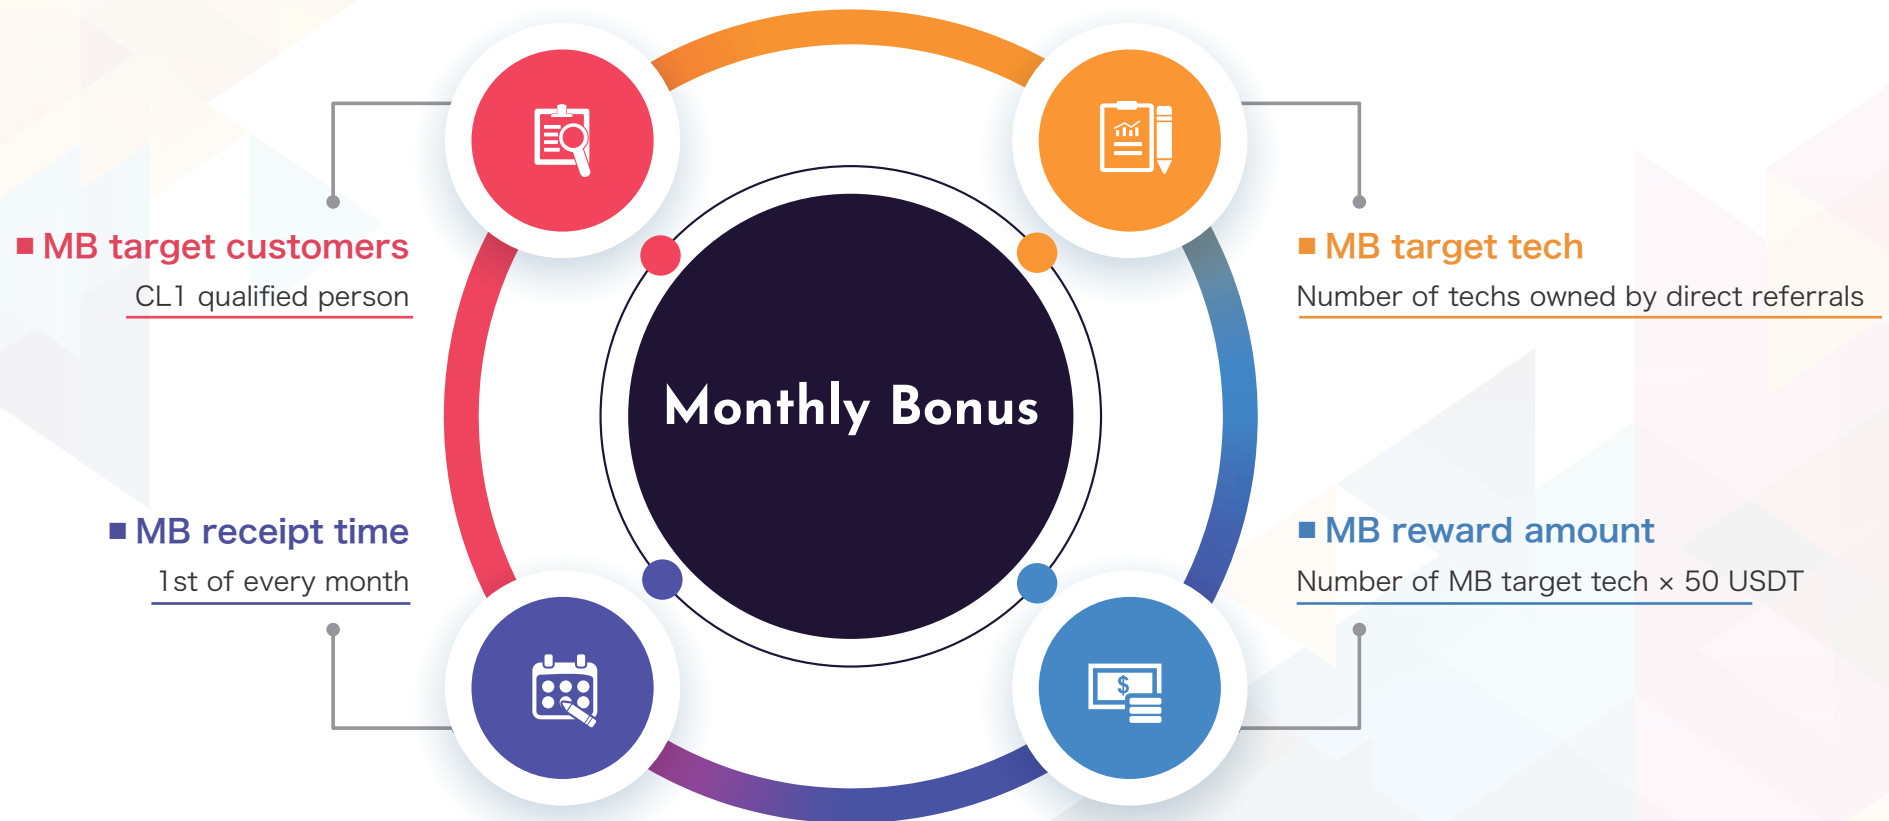

※1st stage=Directry

※2nd and subsequent stages=Indirect

Monthly Bonus (MB)

「About Monthly Bonus (MB)」

Not only will the RB reward rate be maximized when you are promoted to the highest customer level "CL1", but you will also receive a monthly bonus (MB). MB reward will be added to the dividend reward on the first day of every month.

Calculation

〔NDH algo DR reward, RB reward, MB reward calculation method〕

In addition to the NDH algo dividend reward (DR reward), the Reward bonus (RB reward) and monthly bonus (MB reward) that are added depending on the situation are calculated as follows.

NDH algo DR reward (common)

DR 1tech Dividend amount × self owned tech

+

Reward Bonus **RB**、Monthly Bonus **MB**

CL1

RB 1tech Dividend amount × RB target tech (1st) × 20%
RB 1tech Dividend amount × RB target tech (2nd~) × 10%

+

MB Number of MB target tech × \$50

CL2

RB 1tech Dividend amount × RB target tech (1st) × 17%
RB 1tech Dividend amount × RB target tech (2nd~) × 8%

CL3

RB 1tech Dividend amount × RB target tech (1st) × 15%
RB 1tech Dividend amount × RB target tech (2nd~) × 6%

CL4

RB 1tech Dividend amount × RB target tech (1st) × 10%
RB 1tech Dividend amount × RB target tech (2nd~) × 4%

CL5

RB 1tech Dividend amount × RB target tech (1st) × 5%
RB 1tech Dividend amount × RB target tech (2nd~) × 2%

DR **RB** You can pick it up twice a month on the 1st and 15th of every month.

MB You can only pick it up on the first day of every month.

Reference

「Reference example of dividend compensation amount for each CL」

		CL1	CL2	CL3	CL4	CL5
Self owned tech quantity ※1		10 tech	10 tech	10 tech	10 tech	10 tech
Dividend reward (DR)		1,020 USDT	1,020 USDT	1,020 USDT	1,020 USDT	1,020 USDT
Reward Bonus ※2	1st Target tech	10 tech	5 tech	3 tech	1 tech	—
	RB reward	204 USDT	86 USDT	45 USDT	10 USDT	—
Reward Bonus ※3	2nd~ Target tech	30 tech	15 tech	9 tech	3 tech	—
	RB reward	306 USDT	122 USDT	55 USDT	12 USDT	—
Monthly Bonus ※4	MB target tech	10 tech	—	—	—	—
	MB reward	500 USDT	—	—	—	—
Total payment reward		2,030 USDT	1,228 USDT	1,120 USDT	1,042 USDT	1,020 USDT

※1 In order to make it easier to understand the difference in the total amount of compensation for each CL, the number of self-owned techs is the same.

※2 The tech quantity for the 1st stage RB is the CL standard value.

※ Average dividend compensation stated on page 7: Calculated based on 102 USDT.

※3 The quantity of techs targeted for the 2nd stage RB is the same ratio (3 times) from the number of techs targeted for the 1st stage RB.

※4 MB rewards can only be received on the first day of every month.
